- Broad**, balanced and personalised offer
- Developing** communication skills
- Building** self-confidence and self-esteem
- Developing** literacy and numeracy skills
- Embedding** skills across the waking day
- Developing** spiritual, moral, social and cultural awareness and skills

Key Stage 3: Entry Level Pathway Curriculum programme

Organisation

Students who are in Years 7, 8 and 9 and working between P8 and National Curriculum Level 3, work in our Key Stage 3 Entry Level Pathway class groups. These students are likely to move on to complete Entry Level qualifications when they start Year 10 and Key Stage 4.

In order to ensure the most appropriate peer groups for learning, we teach in mixed age groups at Key Stage 3. On average there are six students in each form group, and each form group has its dedicated class teacher, multidisciplinary team and support assistants.

The curriculum

A multidisciplinary approach to the delivery of the curriculum is important in order to prioritise and meet the needs of the whole child.

The curriculum is based on the National Curriculum, modified and adapted to meet individual students' needs, abilities and interests. Students are taught by their form tutor for around two thirds of the curriculum, which enables cross curricular work and transferring skills to different contexts. The remaining third of the curriculum is delivered by a number of different subject specialists – such as Science, Music, PE, swimming and Design and Technology.

Students in Year 9 are given the opportunity to consider their options for their curriculum in Key Stage 4. English, Maths, Science, PE, PSE, ICT and RE are areas of the curriculum that all students continue to follow in Key Stage 4. The option subjects that are offered at Key Stage 4 are based on the choices made by students, alongside the teacher's assessment of their ability to successfully complete a course at a specific level. The topics for 2018 – 2019 are those listed in Year 2 below.

Year 1 Topics	Prominent Architecture - Famous Buildings (architects) Extraordinary Expeditions Journeys (space)	Endangered ECO Environments Rainforest	Victorian Ingenuity Victorians (Inventions and Discoveries)
Year 2 Topics	Where in the World? Globes/maps/grids/ atlas Around the World in 80 Days Transport (through the ages)	Planet Earth Amazing places	Roman Rule!! Romans
