

Progression Example

Dave joined us 12 years ago bringing a wealth of transferable skills with him from previous roles. The Assistive Technology Team gave him the chance to use his problem solving skills in a more user-focused way. Over the years he has honed his skills and knowledge of disability and in 2017 was promoted to the newly created post of Senior Assistive Technology Technician. Dave is a valued member of the team who not only supports his team but helps our students to achieve their potential through his work.

“Every day is different. I love the way we impact the students. They empower and astonish us”
