

Technology Career Path

Progression Example

Matthew joined Treloar's in 2016 as IT Helpdesk Administrator. We knew he had a strong skill set and impressed so much in his first year that when a vacancy came up for Business Systems Developer he applied and was successful. Treloar's also supported Matthew with external training to expand his skills in this area.

“The opportunities for progression are exceptional and the embracing approach to training and personal career development found here cannot be overestimated.

I've enjoyed how receptive our incredible HR, Training and Technology teams have been to embrace my prior skills, later enhancing them with a dynamic career pathway.

This increases an already high sense of job satisfaction that results from contributing to the inspiring, caring and positive work here at Treloar's.”
