

I need to have an injection

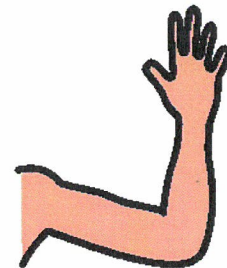

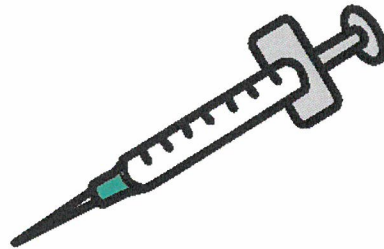

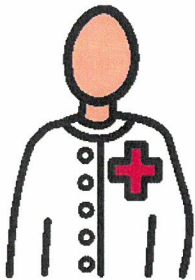

This will help protect me from coronavirus

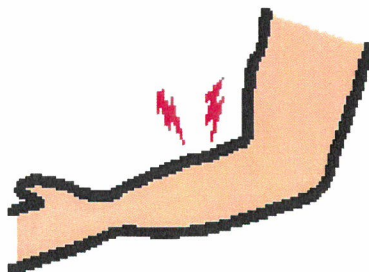

I will go to the vaccination centre for my injection

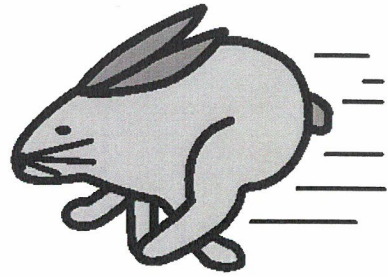

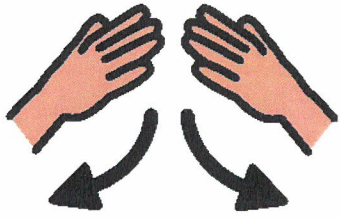

The nurse or doctor will give me the injection in my arm

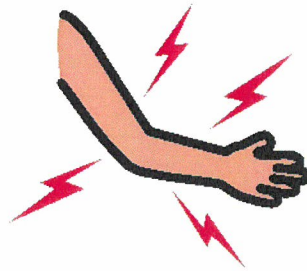

I might feel a sharp scratch

It will be finished quickly

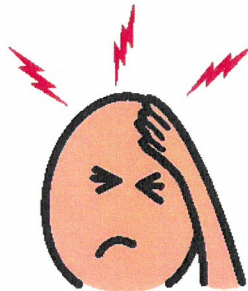

My arm might feel sore

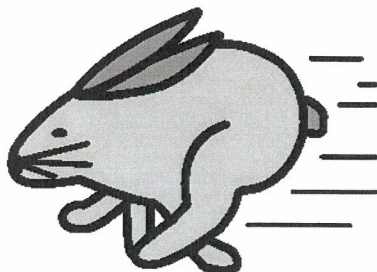

I might feel a bit tired

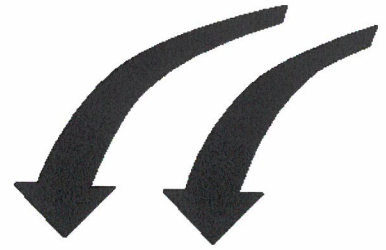

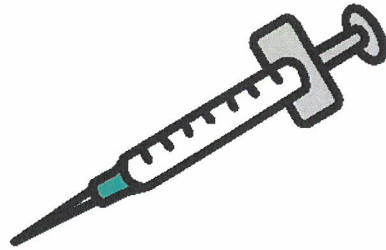

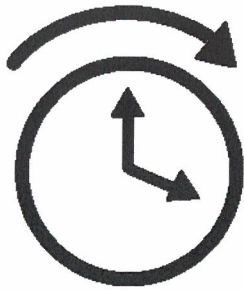

I might have a headache

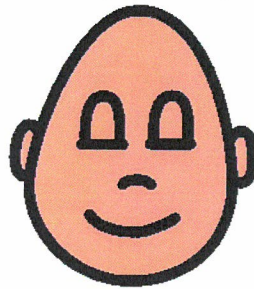

This wont last long

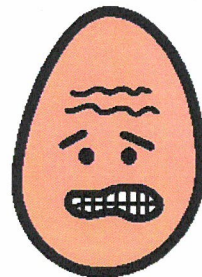

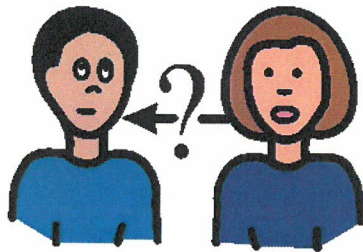

A few weeks later I will need to have the injection again

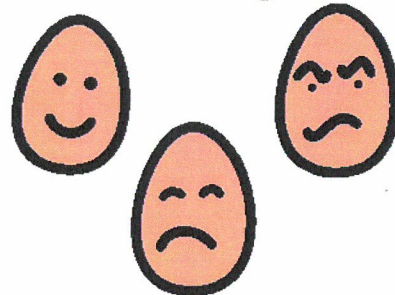

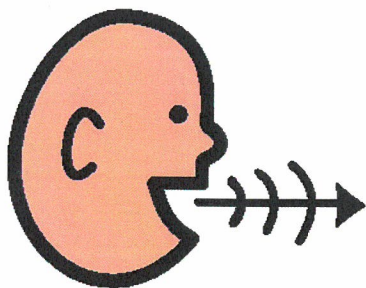

This will help keep me safe

I can ask questions if I feel worried

I can talk about how I'm feeling
