		48	0.55	0.10	0.05	0.70
		60+	0.50	0.10	0.05	0.65
Please refer to notes overleaf						

Notes:

1. NB: These prices are for quantities **of the same design**
2. All prices are exempt from VAT (because TreloarPrint is an educational enterprise).
3. For **larger quantities, please ask**. We cannot economically produce smaller quantities or alternative quantities to those listed.
4. We use 'single-sided card': coated one side (the outside of cards), uncoated the other (for the inside, can be written on with biro).
5. We can use other card if you wish - please ask - although the prices will be the same (unless you specify card we do not stock).
6. The envelopes we supply are good quality white 'peel and seal'.
7. We supply 'peel and seal' cellophanes unsealed so that you may repack cards or add additional information if you wish.
8. Due to the nature of our printing processes **we cannot guarantee complete colour accuracy**. However, most customers are very pleased with what we produce.
9. We may have to crop images that are the wrong proportions for the chosen size of card.
10. In order to print a design 'borderless', we will trim a little off the edges of the design.
11. If you need us to be involved in **design work** (other than placing an image onto a template and adding straightforward text), our charges will be calculated on an hourly basis and will cost between £12 and £20 per hour depending on the complexity of the work. We will provide an estimate of the number of hours required for your project and the anticipated cost. However, bear in mind that lengthy consultations will also be charged for, and subsequent complicated changes to the designs will also add to the costs. We will provide you with a time-sheet detailing our work. **All such costs are in addition to those detailed overleaf.**
12. **Special sizes** which are not listed may be produced but will be more expensive – please ask – and also consider that envelopes to suit may not be available.

How to order:

1. Email us with your requirements. Remember to specify quantities, size of card, along with any text to be included.
2. Please supply a high quality digital image of the picture for the card – jpg, tiff or pdf files are all OK, ideally in CMYK and at 300dpi.
3. Please bear in mind the proportions of the image relative to the card size you have in mind.
4. A good digital camera (not some phones) in daylight should provide a good enough image.
5. If you are sending the image from a 'smart device' (e.g. mobile phone or iPad) make sure you send it at the maximum size.
6. We will issue an invoice with the products. You do not need to pay at the time of ordering.
