

Thinkempathy Ltd.

LIVE IN CARE ENABLING THE INDIVIDUAL TO REMAIN IN THEIR OWN HOME

Thinkempathy Ltd.

- Long Term Care
- Complex needs
- Physical Disabilities
- Elderly
- Person Centred Packages
- Dementia

■ Our Ethos

Is to enable the individual to stay in their own home with the care and support they require to enjoy a high quality of life. We offer highly skilled and experienced professionals to offer flexible care to individuals who do not wish to move into a residential or nursing setting.

■ Support Packages

A full assessment will be conducted for each individual involving the service user, family, professionals and funding authority. The client will then work with us to identify what support and care they require which will make up their person centred support package. The extent and type of support will vary from person to person and could include support with shopping, cooking, domestic tasks, personal care, getting out or simply companionship.

■ Complex needs

Our team are able to support individuals with complex needs including PEG feeding, Dementia, Epilepsy, physical disabilities and sensory disabilities.

■ Funding

The individual can fund their support in away that suits their individual circumstances often through direct payments or directly from their funding authority. The support package will identify what hours of support is required which will be regularly reviewed alongside progress.

■ Our staff

We very carefully recruit the right calibre of staff and place them with the individual that requires their particular skill set. We ensure that all staff have the required training and any additional training to meet your particular support needs. All staff receive regular supervision and support and we monitor their performance on an ongoing basis to ensure you are receiving the correct support.
