

Thinkempathy

Supported living Person centred support enabling individuals to maximise their potential

- **Supported living**
- **Mental Health**
- **Complex needs**
- **Autistic Spectrum Disorder**
- **Epilepsy**
- **Sensory impairment**

■ **Our Ethos**

Is to enable the individual to maximise their potential within a safe and supportive environment. In order to achieve this we will ensure the staff supporting each tenant will have the experience knowledge and training to ensure high quality care and support.

■ **Support Packages**

A full assessment will be conducted for each individual involving the tenant, family, professionals and funding authority. The tenant will then be involved in developing a support package that meets their needs in all areas and promotes choice and independence.

■ **Funding**

The individual can fund their support in away that suits their individual circumstances often through direct payments or directly from their funding authority. The support package will identify what hours of support you require which will be regularly reviewed alongside progress.

■ **Housing**

We work alongside housing providers who understand the specific requirements if the service user group that we support. The team at Thinkempathy and the landlord will aid the individual to apply for housing benefit to pay their rent if required.

■ **Lifestyle and opportunities**

The team at Thinkempathy will support each and every individual that they support to explore and access leisure, social, educational and occupational opportunities in the local area taking into consideration their choices, preferences and cultural requirements.
